

Four 4's Activity

Description

This activity has students find every number between 1 and 20 using only four 4's and any operation.

Prep Work

None.

Instructions

Have students find every number between 1 and 20 using only four 4's and any operation.

- **Pre Activity**

Write the numbers between 1 and 20 on the white board with space between them for students solutions.

- **Activity**

Students look for ways to find the numbers between 1 and 20 and then put their solution any time they find one. The more solutions the class find for each number the better.

- **Post Activity**

Talk with the class about the order of operations and different operations they already know.

Time Required

20-50 min you set the limit. If they do not get them all in class have them bring answers the next day.
