

## Equation Stories Activity

### Description

This activity has students write their own word problem and solution. The focus is on good definitions and sentence answers with units.

---

### Prep Work

Create a Google Slides document to be the examples and template for students to work with. Create a share link so all students can get to the file and edit it.

---

### Instructions

- **Pre Activity**

Send link to share document with all students.

- **Activity**

Have students work individually or in groups of two to make up their own word problem and solve it on the template document you created.

Have each student or group of students share their slide with the class. Allow the class to critique the problem and the definitions and sentence answers students present.

- **Post Activity**

Discuss what good sentences and definitions of variables with units look like.

---

### Time Required

30 minutes

---
