

## Candy Project

### Description

Students are given a nutrition scenario that requires a system of inequalities to solve. They are given the nutrition information from several types of Halloween candy to work with.

---

### Prep Work

Print candy project instructions and nutrition info sheet for each student. Bring candy if you like.

---

### Instructions

- **Pre Activity**

None

- **Activity**

Describe what you want the report to look like. Do you want it typed or digital? Have students work through the activity and create a report. This can be done completely in class or outside class.

- **Post Activity**

None

---

### Time Required

50-120 minutes can be done outside class.

---
